PROFESSIONAL SUMMARY

Analytical and detail-oriented BBA (Business Analytics) student with hands-on experience in data visualization, statistical analysis, and business intelligence reporting. Skilled in Tableau dashboard development, SQL data querying, and Excel-based financial and operational analysis. Experienced in analyzing multi-domain datasets including e-commerce pricing, airline ticket data, AI productivity metrics, and fitness performance data. Strong ability to translate raw data into actionable business insights for revenue optimization, operational efficiency, and strategic decision-making.

EDUCATION

Bachelor of Business Administration (BBA) – Business Analytics
Dev Bhoomi Uttarakhand University
Expected Graduation: 2027

Relevant Coursework:

Business Analytics, Statistics, Finance Analytics, Cost & Management Accounting, Human Resource Management, Data Visualization, Research Methodology.

TECHNICAL SKILLS

Data Analysis & Statistics

- Descriptive statistics, regression analysis, correlation analysis
- KPI analysis, trend analysis, variance analysis

Data Tools

- Tableau Public / Tableau Desktop
- Microsoft Excel (Pivot Tables, Data Modeling, What-If Analysis)
- SQL (Data querying, joins, aggregation, filtering)

Programming & Analytics

- Python (Pandas, NumPy, basic data analysis)
- Data cleaning and transformation

Visualization & Reporting

- Dashboard development
- Data storytelling and business insight generation

ANALYTICS PROJECTS

E-Commerce Pricing & Revenue Analytics Dashboard

Tools: Tableau, Excel

- Analyzed pricing, discounts, and customer ratings across e-commerce product datasets.
- Built interactive Tableau dashboards to identify revenue drivers and discount effectiveness.
- Identified relationships between discount percentage and product adoption trends.

Indian Domestic Flight Price Analysis

Tools: SQL, Tableau

- Analyzed airline ticket datasets to evaluate factors influencing ticket prices including stops, duration, and airline.
- Built regression-based scatter plots and price distribution visualizations.
- Generated insights on pricing volatility and airline price strategies.

Gym Member Performance Analytics

Tools: Python, Tableau

- Conducted correlation analysis between workout duration, BMI, heart rate, and calories burned.
- Developed efficiency metrics (Calories Burned per Hour) to evaluate workout effectiveness.
- Visualized performance patterns using scatter plots and trend analysis.

KEY ANALYTICAL COMPETENCIES

- Data Cleaning and Transformation
- Dashboard Design and KPI Monitoring
- Business Performance Analysis
- Financial and Cost Analytics
- Data-Driven Decision Support

CERTIFICATIONS / LEARNING

Data Analytics Tools (Self-Learning)

- SQL for Data Analysis
- Tableau Dashboard Development
- Python for Data Analysis

ADDITIONAL INFORMATION

Areas of Interest

- Business Intelligence
- Financial Analytics
- E-commerce Data Analytics
- Product and Operational Analytics

Career Objective

To apply analytical and statistical skills to solve real business problems and support data-driven decision making in organizations.
